

PRODUCT DESCRIPTION

BF MYLAR is an adhesive polyester film, covered with a removable backing on one side, to be used as a support for the application of heat transfer vinyl for digital printing. Once the silicone paper has been removed, apply the film on the printed material avoiding the formation of air bubbles between the two materials.

For removal, we recommend checking the instructions included in the technical data sheets of the printable product being used.

APPLICATION STEPS

- Remove the protective paper liner
- Apply BF MYLAR vigorously to the printed material, manually, with the use of a laminator or with the use of a spatula, avoiding the formation of air bubbles
- Remove the printed material liner
- Place the print on the garment to be decorated
- Apply as per the instructions indicated in the printable film data sheets
- For removal, check each time the data sheets of the individual printable product

Comply with regulation **REACH** n°1907/2006/EU

SAFETY NOTICE

The values reported in this document are average values as tested under normal conditions in our lab. We cannot provide a guarantee regarding the information above mentioned in this page. Due to possible variations in the production of garments, B-FLEX recommends testing the material prior to all applications. Rev_2021/03

TECHNICAL DATA

Film: PET/polyester

Thickness: 100μ (±5%)

Liner: paper

Finish: gloss

APPLICATION

Temperature: See spec sheet for the printable media being used

Liner removal: See spec sheet for the printable media being used
